EXPERIENCE

FRONT END ENGINEER

Muck Rack: 2019 – Present

Develops User Interface features that display data for reports, pitches, and account profiles

- ◆ Responsible for building both server side and browser side business logic
- ◆ Works asynchronously with a team of distributed engineers, product owners, designers, and sales professionals
- ◆ Applies functionality with performance and accessibility as a top priority

WEB / APP DEVELOPER

Square 205: 2019 – 2020

Led team in product scope, built front-end applications and server-side APIs

- ◆ Developed architecture and features for React and React Native apps
- ◆ Worked on Node apps which communicate with WordPress and other services
- ◆ Collaborated remotely with developers, designers, and project managers, and clients to discuss product needs

FRONT END DEVELOPER

Sabre Hospitality Solutions: 2017 – 2019

Built User Interface components and websites for global hotel companies

- ◆ Created an autocomplete search and map view using React Hooks that allowed users to find and filter through over thousands of hotels by location or name
- ◆ Introduced modern tools such as React, Webpack, ESLint, Stylelint, and testing in order to encourage high quality code

WEB DEVELOPER

Freelance: 2016 – 2017

Worked with the WordPress, React, and front end build tools

PROJECTS

Muck Rack

Python Django website containing multiple Vue apps that allows users to easily search for journalists, monitor news, build reports, and pitch Journalists

N-Abler

WordPress website which uses TypeScript and React for the Search Catalog page as well as for the global autocomplete search

Eatzi's Market & Bakery

E-commerce food service website built with WordPress, WooCommerce, and a React app to handle the online store, as well as Node & Express to handle printing orders to employees

Upventur

React Native app for capturing experiences in the outdoors and organizing meetups with people of similar interests
