EXPERIENCE

FRONT END ENGINEER
Muck Rack: 2019 – Present

Develops User Interface features that display associated data for account profiles

- Works asynchronously with a team of distributed engineers, product owners, designers, and sales professionals
- Applies functionality with performance and accessibility as a top priority

APP DEVELOPER
Square 205: 2019 – 2020

Led team in project scope, built front-end applications and server-side APIs

- Worked remotely with developers, designers, and project managers to discuss client needs and build out features
- Developed architecture of client side applications using React and Apollo
- Mentored, guided, and collaborated with other developers

FRONT END DEVELOPER
Sabre Hospitality Solutions: 2017 – 2019

Built User Interface components and websites for global hotel companies

- Created an autocomplete search and map view using React Hooks that allowed users to find and filter through over thousands of hotels by location or name
- Introduced modern tools such as React, Webpack, ESLint, Stylelint, and testing in order to encourage high quality code

WEB DEVELOPER
Freelance: 2017
Worked with the WordPress, React, and front end build tools

PROJECTS

Muck Rack
Python Django app that helps businesses modernize their PR as well as support Journalists

Upventur
React Native app for capturing experiences in the outdoors and organizing meetups with people of similar interests

Historic Hotels Worldwide – Find A Hotel
React app within a website that has an autocomplete search and a map canvas used for booking hotels around the world
